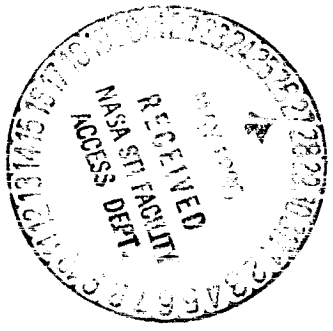
INDEX OF NACA TECHNICAL PUBLICATIONS

1915 - 1949



WASHINGTON, 1949

NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS

The Index of NACA Technical Publications covers reports issued from the date of origin of the Committee in 1915 until approximately September 1949.

Because omissions were noted after publication of the Index issued in 1947, and since many new reports have been released since that time, it was decided to issue a new volume to supersede completely the 1947 Index, with supplements to be issued regularly in the future.

Commencing with all publications issued after September 1, 1949, subject classifications were revised, the most important change involving the transfer of aircraft loads reports from the Aerodynamics classification to Structures. For those maintaining a file of NACA index cards, it is recommended that cards issued for reports dated prior to September 1, 1949 be removed from the file. This volume includes the same index information. Supplements covering periods following September 1, 1949, will be arranged according to the revised subject classifications.

On the pages immediately following, the subject classifications are indexed in order of breakdown. There is included in the back of this volume an alphabetical arrangement of the subject classifications.

Division of Research Information

CONTENTS

Subject No.	Subject	Page
1	AERODYNAMICS	1
1.1	FUNDAMENTAL	2
1.1.1	Incompressible Flow	4
1.1.2	Compressible Flow	6
1.1.2.1	SUBSONIC FLOW	8
1.1.2.2	MIXED FLOW	11
1.1.2.3	SUPERSONIC FLOW	13
1.1.3	Viscous Flow	16
1.1.3.1	LAMINAR FLOW	18
1.1.3.2	TURBULENT FLOW	20
1.1.3.3	JET MIXING	22
1.1.4	Aerodynamics with Heat	22
1.1.4.1	HEATING	23
1.1.4.2	HEAT TRANSFER	23
1.1.4.3	ADDITIONS OF HEAT	25
1.1.5	Flow of Rarefied Gases	25
1.1.5.1	SLIP FLOW	26
1.1.5.2	FREE MOLECULE FLOW	26
1.2	WINGS	27
1.2.1	Wing Sections	27
1.2.1.1	SECTION THEORY	27
1.2.1.2	SECTION VARIABLES	31
1.2.1.2.1	Camber	32
1.2.1.2.2	Thickness	34
1.2.1.2.3	Thickness Distribution	36
1.2.1.2.4	Inlets and Exits	38
1.2.1.2.5	Surface Conditions	38
1.2.1.3	DESIGNATED PROFILES	40
1.2.1.4	HIGH LIFT DEVICES	46
1.2.1.4.1	Plain Flaps	46
1.2.1.4.2	Split Flaps	48
1.2.1.4.3	Slotted Flaps	50
1.2.1.4.4	Leading Edge Flaps	52
1.2.1.4.5	Slots and Slats	53
1.2.1.5	CONTROLS	54
1.2.1.5.1	Flap Type	54
1.2.1.5.2	Spoilers	58
1.2.1.6	BOUNDARY LAYER	59
1.2.1.7	REYNOLDS NUMBER EFFECTS	62
1.2.1.8	MACH NUMBER EFFECTS	66
1.2.2	Complete Wings	69
1.2.2.1	WING THEORY	70
1.2.2.2	WING VARIABLES	75
1.2.2.2.1	Profiles	76
1.2.2.2.2	Aspect Ratio	79
1.2.2.2.3	Sweep	82
1.2.2.2.4	Taper	86
1.2.2.2.5	Inlets and Exits	88
1.2.2.2.6	Surface Conditions	89
1.2.2.3	HIGH LIFT DEVICES	91
1.2.2.3.1	Flaps	91
1.2.2.3.2	Slots and Slats	96
1.2.2.4	CONTROLS	98
1.2.2.4.1	Flap Type	99
1.2.2.4.2	Spoilers	103
1.2.2.5	REYNOLDS NUMBER EFFECTS	104
1.2.2.6	MACH NUMBER EFFECTS	106
1.2.2.7	WAKE	111
1.2.2.8	BOUNDARY LAYER	113
1.3	BODIES	114
1.3.1	Theory	114
1.3.2	Shape Variables	117
